

## **Jim Pepin**

### **Chief Technology Officer, Clemson University**

---

Jim Pepin is Clemson University's Chief Technology Officer (CTO) and Director of High Performance Computing. He began his duties in February 2007 within the Office of the Vice Provost for Computing and Information Technology and CIO.

Pepin's role at Clemson includes advising the CIO on technical issues; leading the development of Clemson's technical roadmaps; working with the community to define technical architecture; leading the development of Clemson's high performance computing environment; serving as an adjunct in Clemson's School of Computing; evaluating new technologies and serving on national technical committees.

Previously, Pepin was the Chief Technology Officer at the University of Southern California and the Director of the Center for High Performance Computing and Communications in USC's Information Technology Services organization. As CTO at USC, he was responsible for all high performance network infrastructure and facilities.

Pepin has also worked on a number of high profile projects, including heading up the Los Angeles Access Point, a key Internet utility operated by USC's Information Sciences Institute that serves all major Southern California colleges and Universities (including Caltech and the UC and CSU systems).

Pepin has significant experience in determining support requirements of end users and in implementing large-scale networks and high performance computing systems used for computation-intensive research.
