

Christopher Post

Associate Professor, Clemson University

Dr. Post is a faculty member in the Department of Forestry and Natural Resources at Clemson University. Dr. Post is involved in a wide range of research projects involving the application of geographic information systems (GIS) and remote sensing technologies to natural and water resource applications. In addition, he is a leader in the development and application of environmental sensor networks and related technologies. Dr. Post is also interested in geospatial aspects of soil science and the global carbon cycle

Research interests:

- Environmental sensor networks for soil and water resources
- Spatial data repositories for sensor and other spatial information
- Hardware development of accessible devices to enable wide application of sensor networks in the environmental sciences
